

SERIES 156 & 157

ENVIRO-CRETE®

PROTECTIVE COATING FOR CONCRETE AND MASONRY

Coating concrete and masonry shouldn't be complicated. Tnemec's flexible, breathable waterborne acrylate, Enviro-Crete, is formulated to coat a variety of surfaces – from masonry in commercial buildings to prestressed water tank exteriors – and provides excellent elastomeric protection against the elements.

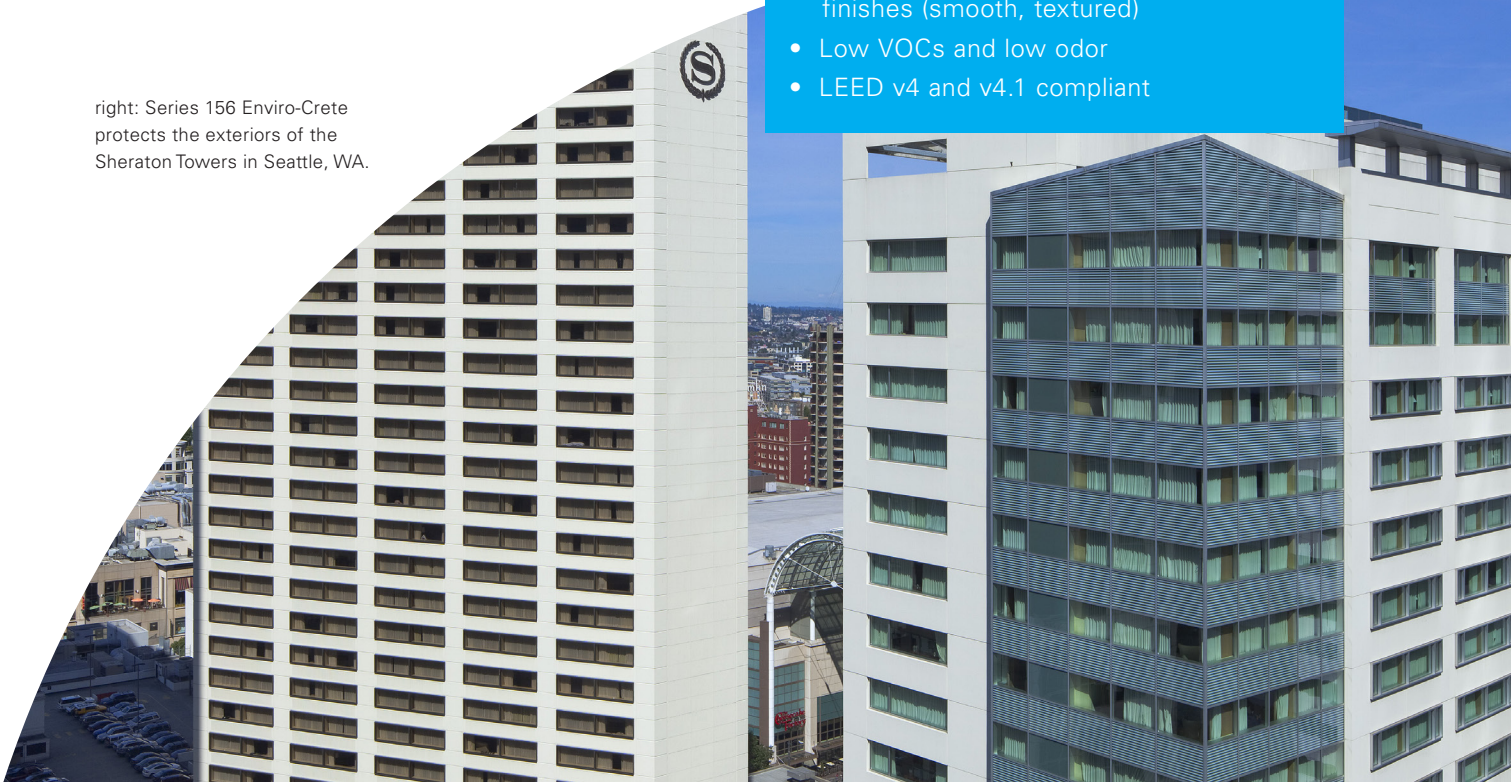

Whether coating a new structure or repainting over aged coating systems, Enviro-Crete can be applied by brush, roller, or spray, and leaves the surface protected from corrosive elements. The product contains no solvent and is low odor, making it convenient to apply and, containing less than 50 grams/liter volatile organic compounds (VOC), meets the strictest air quality regulations. It is available in a variety of colors and two different finishes – Series 156 (smooth) or Series 157 (textured) – depending on the needs of the project and the client.

right: Series 156 Enviro-Crete protects the exteriors of the Sheraton Towers in Seattle, WA.

Enviro-Crete has offered protection to surfaces for over 30 years with unrivaled success. From high-rise towers in Seattle to water storage tanks in Nashville, the high-performance qualities of Enviro-Crete have enhanced the appearance and extended the life cycle of buildings and vessels across the country, helping prevent the damaging effects of moisture intrusion and UV light.

ENVIRO-CRETE BENEFITS

- Excellent elastomeric protection (driving rain, alternate freezing-thawing and UV light)
- Fill and bridge minor hairline cracks
- Easy application – brush, roll or spray
- New construction or maintenance painting
- Available in a variety of colors and two finishes (smooth, textured)
- Low VOCs and low odor
- LEED v4 and v4.1 compliant

EXTRA CREDIT COATING

Enviro-Crete's waterborne, low VOC formulation can assist architects and owners in achieving green building initiatives, such as Leadership in Energy and Environmental Design (LEED). It meets critical emissions limits and moisture/vapor transmissions rates, making it the ideal coating for green-conscious specifiers.

TRUSTED CHOICE FOR TANKS AND TREATMENT FACILITIES

Tnemec products have been applied in and around water and wastewater treatment plants for decades, providing owners with long-lasting protection against corrosion, abrasion, UV light degradation and more. When it comes to prestressed and cast-in-place concrete tank and basin exteriors, Enviro-Crete is one of the most-trusted coating solutions for owners and tank builders across the world, because of its quality finish, versatility and ability to bridge hairline surface cracks during new and retrofit applications.
